

Serial	Title	Category
1	What is Bioinformatics	Introduction to Bioinformatics
2	Applications of Bioinformatics: Genomics	Introduction to Bioinformatics
3	Applications of Bioinformatics: Therapeutics	Introduction to Bioinformatics
4	Types of Biological Databaes	Bioinformatics Databases
5	Primary Database	Bioinformatics Databases
6	Secondary Database	Bioinformatics Databases
7	Specialized Database	Bioinformatics Databases
8	Information Retrieval from Biological Databases	Bioinformatics Databases
9	What is Alignmnet	Sequence Analysis and Alignment
10	What are Gap Penalties	Sequence Analysis and Alignment
11	Evolutionary Basics of Alignment	Sequence Analysis and Alignment
12	Pairwise Sequence Alignment	Sequence Analysis and Alignment
13	Global Alignment	Sequence Analysis and Alignment
14	Local Alignment	Sequence Analysis and Alignment
15	Multiple Sequence Alignment	Sequence Analysis and Alignment
16	Sequence Homology vs. Sequence Similiarity	Sequence Analysis and Alignment
17	Orthologs vs. Paralogs	Sequence Analysis and Alignment
18	Common Alignment Algorithms	Sequence Analysis and Alignment
19	Dot Matrix	Sequence Analysis and Alignment
20	Dynamic Programming	Sequence Analysis and Alignment
21	Type of Scoring Matrices	Scoring Matricies
22	PAM Matrices	Scoring Matricies
23	BLOSUM Matrices	Scoring Matricies
24	Comparison Between PAM and BLOSUM	Scoring Matricies
25	Scoring Functions for Multiple Sequence Alignment	Scoring Matricies
26	Heuristic Algorithms vs. Exhaustive Algorithms	Multiple Sequence Alignment
27	Progressive Alignment	Multiple Sequence Alignment
28	Iterative Alignment	Multiple Sequence Alignment
29	Block-based Alignment	Multiple Sequence Alignment
30	What is BLAST	Databases Searching
31	E-Value: Statistical Significance in BLAST	Databases Searching

32	Low Complexity Regions	Databases Searching
33	Position Specific Scroing Matrices (PSSM)	Databases Searching
34	Position-Specific Iterated BLAST (PSI-BLAST)	Databases Searching
35	Reptitive Regions on Genome	Databases Searching
36	Sequence Profiles and Fingerprints	Databases Searching
37	Hidden Markov Models in Bioinformatics	Databases Searching
38	What is a Domain	DNA & Protein Analysis
39	What is a Motif	DNA & Protein Analysis
40	Domain vs. Motif Prediction	DNA & Protein Analysis
41	Motif and Domain Databases	DNA & Protein Analysis
42	What are Gene Families	Protein & Gene Families
43	What are Protein Families	Protein & Gene Families
44	Protein Family Databases	Protein & Gene Families
45	Motif Discovery in Unaligned Sequences	Protein & Gene Families
46	What are Sequence Logos	Protein & Gene Families
47	What is Gene Prediction	Gene Prediction
48	Gene Prediction in Prokaryotes	Gene Prediction
49	Gene Prediction in Eukaryotes	Gene Prediction
50	What are Open Reading Frames	Gene Prediction
51	Gene Prediction Using Open Reading Frames	Gene Prediction
52	Gene Prediction Using Markov Models	Gene Prediction
53	Type of Gene Prediction Programs	Gene Prediction
54	What are Regulatory Elements	Regulatory Elements
55	What are Promoters	Regulatory Elements
56	What are Transcription Factors	Regulatory Elements
57	Promoters and Regulatory Elements in Prokaryotes	Regulatory Elements
58	Promoters and Regulatory Elements in Eukaryotes	Regulatory Elements
59	Prediction of Promoters and Regulatory Elements in Prokaryotes	Regulatory Elements
60	Prediction of Promoters and Regulatory Elements in Eukaryotes	Regulatory Elements
61	Prediction of Promoters and Regulatory Elements Using Expression Data	Regulatory Elements
62	What is Molecular Evolution	Evolution and Phylogenetic Trees

63	What is Phylogenetics	Evolution and Phylogenetic Trees
64	What is Molecular Phylogenetics	Evolution and Phylogenetic Trees
65	What is the Basic Terminology Used in Molecular Phylogenetics	Evolution and Phylogenetic Trees
66	Gene Phylogeny vs. Species Phylogeny	Concepts of Phylogenetic Trees Contruction
67	Forms of Tree Representation	Concepts of Phylogenetic Trees Contruction
68	Steps involved in Construction of Phylogenetic Tree	Concepts of Phylogenetic Trees Contruction
69	Phylogenetic Substitution Models	Phylogenetic Models
70	Jukes-Cantor Model	Phylogenetic Models
71	Kimura Model	Phylogenetic Models
72	Phylogenetic Tree Construction Methods	Construction of Phylogenetic Trees
73	Distance Based Method for Phylogenetic Tree Construction	Construction of Phylogenetic Trees
74	Clustering Based Method for Phylogenetic Tree Construction	Construction of Phylogenetic Trees
75	Uneighted Pair Group Method Using Arithmetic Average (UPGMA)	Construction of Phylogenetic Trees
76	Neighbor Joining (NJ)	Construction of Phylogenetic Trees
77	Character-based Methods	Construction of Phylogenetic Trees
78	Maximum Parsimony Method	Construction of Phylogenetic Trees
79	Maximum Likelihood Method	Construction of Phylogenetic Trees
80	Phylogenetic Tree Evaluation	Construction of Phylogenetic Trees
81	Boostrapping in Phylogenetics	Construction of Phylogenetic Trees
82	Parametric and Non-parametric Bootstrapping	Construction of Phylogenetic Trees
83	Tools for Phylogenetic Tree Construction	Construction of Phylogenetic Trees
84	What is Structural Bioinformatics	Introduction to Structural Bioinformatics
85	Protein Structure Basics	Introduction to Structural Bioinformatics
86	How to Identify Favourable Regions of Proteins in Ramachandran Plot	Structural Features of Proteins
87	What are Stablizing Forces of Protein Structures	Structural Features of Proteins
88	What are Secondary Structures of Proteins	Structural Features of Proteins
89	What are Teritiary Structures of Proteins	Structural Features of Proteins
90	What are Quaternary Structures of Proteins	Structural Features of Proteins
91	How Protein Structures are Deteremined Experimentally	Determination of Structures of Proteins
92	What is X-ray Crystallography	Determination of Structures of Proteins
93	What is Nuclear Magnetic Resonance (NMR) Spectroscopy	Determination of Structures of Proteins

94	What is 3D Structure Prediction & Modelling	Determination of Structures of Proteins
95	What are Protein Structure Databases	Protein Structure Databases & Formats
96	File Formats: PDB, mmCIF, MMDB	Protein Structure Databases & Formats
97	Protein Structure Visualization	Protein Structure Visualization & Manipulation
98	Protein Structure Alignment & Comparison	Protein Structure Alignment
99	Intermolecular Method for Protein Structure Comparison	Protein Structure Alignment
100	Intramolecular Method for Protein Structure Comparison	Protein Structure Alignment
101	Combined Method for Protein Structure Comparison	Protein Structure Alignment
102	Multiple Protein Structure Alignment	Protein Structure Alignment
103	Protein Structure Classification Databases	Protein Structure Databases & Formats
104	Comparison Between SCOP and CATH	Protein Structure Databases & Formats
105	Secondary Structure Prediction of Proteins	Secondary Structure Prediction
106	Secondary Structure Prediction of Proteins of Globular Proteins	Secondary Structure Prediction
107	Ab Initio Methods for Secondary Structure Prediction	Secondary Structure Prediction
108	Homology-Based Methods for Secondary Structure Prediction	Secondary Structure Prediction
109	Machine Learning Based Prediction Methods for Secondary Structure Prediction	Secondary Structure Prediction
110	Prediction Accuracy of Various Methods	Secondary Structure Prediction
111	Secondary Structure Prediction of Proteins of Helical Membrane Proteins	Secondary Structure Prediction
112	Secondary Structure Prediction of Beta Barrel Membrane Proteins	Secondary Structure Prediction
113	Coiled Coil Prediction	Secondary Structure Prediction
114	Methods for 3D Structure Prediction	3D Structure Prediction
115	Homology Modeling	Homology Modeling
116	Loop Modeling	Homology Modeling
117	Side Chain Refinement	Protein Structure Validation and Refinement
118	Modeling Refinement Using Energy Function	Protein Structure Validation and Refinement
119	Protein Model Evaluation & Validation	Protein Structure Validation and Refinement
120	Commonly Used Modeling Tools	Homology Modeling
121	Homology Modeling Databases	Protein Structure Databases & Formats
122	Threading and Fold Recognition	Fold Recognition Modeling
123	Pairwise Energy-Based Database Search Method	Fold Recognition Modeling
124	Profile-Based Database Search Method	Fold Recognition Modeling

125	Ab Initio Protein Structure Prediction	Ab Initio Modeling
126	Critical Assessment of Techniques for Protein Structure Prediction (CASP)	Ab Initio Modeling
127	Introduion to RNA Structure Prediction	RNA Structure Prediction
128	Types of RNA Structures	RNA Structure Prediction
129	RNA Secondary Structure Prediction Methods	RNA Structure Prediction
130	Ab Initio Methods	RNA Structure Prediction
131	Comparative Methods	RNA Structure Prediction
132	RNA Secondary Structure Evaluation & Validation	RNA Structure Prediction
133	Introduction to Genomics	Genomics
134	Next-Generation Sequencing	Genomics
135	Genome Sequencing	Genomics
136	DNA Sequencing	Genomics
137	RNA Sequencing	Genomics
138	Methylation Sequencing	Genomics
139	Genome Mapping	Genomics
140	Genome Sequence Assembly	Genomics
141	Base Calling	Genomics
142	Genome Assemblers	Genomics
143	Genome Annotations	Genomics
144	Gene Ontology	Genomics
145	Annotation of Hypothetical Proteins	Genomics
146	Comparative Genomics	Genomics
147	Whole Genome Alignment of Two or More Species	Genomics
148	With-in Genome Comparative Approaches	Genomics
149	Gene Order Comparison	Genomics
150	Introduction to Functional Genomics	Genomics
151	Protein Expression Analysis	Proteomics
152	Post-Trnslation Modification	Proteomics
153	Portein Sorting	Proteomics
154	Protein-Protein Interactions	Proteomics
155	Subtractive Proteomics	Proteomics
